

# BrightWater Touch Control Tap for Premixed Water

## Specifying BrightWater Touch Control Tap for Premixed Water

To save water BrightWater Touch Control taps shall be installed to each individual basin.

These should be fitted with BrightWater tap aerators to ensure a maximum flow rate of 2.5 L/min from each tap.

These will have the following standard factory control settings:

Power supply options:	Internally mounted 9V battery
Operating water pressure:	1 bar – 6 bar
Maximum hot water temperature:	70° C

- Operated by piezo switch with touch control technology to switch on and off
- Automatic shut off after 20 seconds (adjustable by installer or maintenance staff)
